

Vaccination Validation Required

In accordance with Ontario Provincial Government and Chief Medical Health Officer guidance, starting September 22, 2021, the Royal Harbour Resort in Thornbury will require all guests 12 years of age and older to provide proof of being fully vaccinated to utilize the resort facilities. The Ontario Provincial Government considers an individual as fully vaccinated 14 days following the final dose of an approved vaccine treatment.

Upon entering the resort, guests will need to display either a paper record or receipt, or an official digital PDF version of their vaccination receipt showing full COVID-19 vaccination status along with a government issued photo ID. These documents must be presented upon entering the resort. Arrangements cannot be made to electronically share these documents ahead of your stay. All personal information is kept strictly confidential in accordance with provincial guidelines.

Children under the age of 12 currently not eligible to receive a COVID-19 vaccine are exempt and do not require any validations to enter the resort. **All inquiries and questions about this policy should be emailed askrhr@outlook.com.** Emails will be answered within 48 hours.

Face Coverings Mandatory

As part of our program to safeguard our guests and members we now require all guests, ages 2 and older, to wear a face covering that fully covers their nose and mouth, and secures under their chin, while visiting our resort. Guests are required to wear a face covering in all public areas of the resort, visiting outdoor areas where a physical distance of six feet is maintainable.

We appreciate your support of this initiative, as well as the other protocols put into place as part of our commitment to ensure the health and safety of our guests and members while together at our resort.

Health & Safety Program Overview

We are committed to keeping families safe as they play together at Royal Harbour Resort. We partnered with medical experts, public health officials and sanitizations specialists to develop new procedures that focus on disinfection and sanitization, physical distancing, personal protection, and minimizing surface interactions in all guest areas across the resort.
